

ACADEMIC DETAILS			
B.Tech Computer Science and Engineering	Madanapalle Institute of Technology & Science (Autonomous)	7.37 CGPA	2027
Andhra Pradesh Board of Intermediate Education (BIEAP) (CLASS XII)	Narayana junior college	776 MARKS	2023
Andhra Pradesh Board of Secondary Education (BSEAP) (CLASS X)	Sri Chaitanya English Medium School	98 %	2021
SUBJECTS			
Electives	Data Structures,Machine Learning,Software Engineering ,Python Programming,Database Management Systems (DBMS),Java Programming,Cloud Computing,Data Science		
Technical Proficiency	HTML + CSS,Seaborn,Matplotlib,React.js,SQL,Machine Learning,Java,Scikit-Learn,Pandas,Python,NumPy		
INTERNSHIPS			
Vaidhik Edutech & Innovation Private Limited Machine Learning Intern	• Worked on Machine Learning projects involving data preprocessing, model building, and performance evaluation. • Gained hands-on experience with Python and data analysis techniques in a real-world internship environment.		May 2025 - Jul 2025
PROJECTS			
Movie Recommendation App	Developed a Movie Recommendation Web Application using React.js, Vite, TMDB API, and Appwrite. Implemented movie search functionality with debounced API requests, trending movie analytics, and dynamic movie listings based on popularity. Integrated Appwrite Database to track search metrics and display trending searches. Designed a responsive and user-friendly interface and deployed the application on Vercel for public access. Technologies Used: • React.js • Vite • TMDB API • Appwrite Database • JavaScript • CSS • Git & GitHub • Vercel Key Features: • Search movies from TMDB database • Real-time debounced search • Trending movies section based on user searches • Responsive UI design • Cloud database integration • Live deployment on Vercel https://movie-recommendation-frr5lkyjn-shek-malik-bashas-projects.vercel.app/		Apr 2026 - May 2026
Indoor Sports Booking System	• Developed a web-based indoor sports booking system to enable users to browse and reserve sports facilities online. • Designed an interactive user interface for managing bookings, schedules, and sports venue information. • Implemented responsive web pages to enhance user experience and accessibility.		Feb 2026 - Feb 2026
Pneumonia Detection Using Chest X-Ray Images	• Developed a deep learning-based pneumonia detection system using chest X-ray images and CNN models. • Built an interactive web application using Streamlit to upload X-ray images and display real-time prediction results.		Jan 2026 -

	- Performed image preprocessing and classification to identify pneumonia cases accurately. - Implemented the solution as a team project with a focus on healthcare diagnostics.	Mar 2026
Seizure Prediction System	- Developed a machine learning–based seizure prediction system to analyze patient data and identify potential seizure patterns. - Performed data preprocessing, feature extraction, and model training to improve prediction accuracy. - Applied predictive analytics techniques to support early detection and healthcare decision-making.	Dec 2025 - Apr 2026
CERTIFICATIONS		
Introduction to Data Science Cisco Networking Academy	Completed Introduction to Data Science through Cisco Networking Academy. Learned data science lifecycle, analytics concepts, machine learning basics, and industry applications.	
Google Analytics Certification Google Skillshop Expiry: 04 May 2027	Earned Google Analytics Certification demonstrating proficiency in Google Analytics 4, data collection, reporting, campaign tracking, and performance measurement.	
AWS Cloud Practitioner Essentials AWS Training & Certification	Successfully completed AWS Cloud Practitioner Essentials training. Gained foundational knowledge of cloud computing, AWS services, security, architecture, pricing, and support models.	
Python Essentials 1 Cisco Networking Academy	Successfully completed Python Essentials 1 and gained proficiency in Python fundamentals, data structures, loops, functions, and problem-solving techniques.	
Data Analytics Essentials Cisco Networking Academy		
Data Science & Analytics HP LIFE	Successfully completed the HP LIFE Data Science & Analytics course covering data science methodologies, analytics techniques, business intelligence concepts, and data-driven decision making.	
Machine Learning Using Python Simplilearn	Successfully completed Machine Learning Using Python and learned supervised learning, model development, evaluation techniques, and practical machine learning applications.	
Introduction to Generative AI Simplilearn	Completed Introduction to Generative AI and learned fundamentals of Generative AI, Large Language Models, prompt engineering, and AI applications.	
COMPETITIONS		
ParanoX 2.0 National Innovation Hackathon	Participated in ParanoX 2.0, a 3-month national-level innovation hackathon organized by TechXNinjas. Collaborated on innovative solutions, project development, pitching, and problem-solving while competing among 1,552+ projects and 20,119+ students nationwide.	Nov 2025
Tata Imagination Challenge 2025	Participated in Tata Imagination Challenge 2025 organized by Tata Group through Unstop. Demonstrated analytical thinking, problem-solving abilities, business awareness, and aptitude skills while competing with students from across the country.	Nov 2025
Elite Coders Winter of Code (ECWoC)	Actively participated in Elite Coders Winter of Code (ECWoC), an open-source coding program with over 5000 participants. Demonstrated dedication to open-source development, collaboration, problem-solving, and continuous learning within the developer community.	Nov 2025
MakeForMadanapalle Hackathon	Selected among the Top 15 teams in MakeForMadanapalle, a 2-day Make-a-thon conducted under the Titan Design Impact Movement at Madanapalle Institute of Technology and Science. Demonstrated innovation, problem-solving, teamwork, and commitment to creating social impact solutions for the city of Madanapalle.	Oct 2025
CONFERENCES AND WORKSHOPS		
Be10X AI Tools Workshop Successfully completed the Be10X AI Tools and ChatGPT Workshop. Learned how to use AI tools for creating presentations, analyzing data, Organized by: Be10X Date: Aug 2025		

coding, debugging, and improving productivity through Generative AI applications.
